Skills Bootcamp in
Microsoft Power Platform and Process Automation
12 weeks - Part-time

Overview of the course:

Our brand new 12 week - part-time - Skills Bootcamp in Microsoft Power Platform and Process Automation created in partnership with consultants SY Limited is virtual running 2 days a week, 9.30am to 15:00pm.

Our Skills Bootcamp is designed to increase efficiencies and effectiveness by utilising the Microsoft Power Platform. The Programme includes - Introduction to power platform, solution design, Power Apps Development, Power Automate Development and Dataverse.

You will also understand and learn the fundamentals of ChatGPT, Large Language Model (LLM), Task automation/reminders and how ChatGPT can be used for automated reporting, keeping with the theme of this course - simplifying business processes.

The course will explore the following components:

Power Apps: A low-code application development platform that allows users to create custom applications without writing code.

Power Automate: A workflow automation tool that allows users to automate repetitive tasks and processes. Dataverse – Basic database and Dataverse concepts. Data security and compliance.

What Skills Your Team Will Gain

Mastery of Microsoft Power Platform
Your team will not only learn the fundamentals but also how to navigate and utilise the Power Platform efficiently.

Practical Skills in Power Automate
They'll gain hands-on experience in designing and developing automated workflows, a skill crucial for improving efficiency and reducing manual errors.

Integration Techniques
We cover the integration of Power Apps with Power Automate for comprehensive automation solutions. Vital for developing custom business applications.

Real-world Application
Your staff won't just learn theories; they'll apply these skills in real-world scenarios, ensuring they can bring immediate value to your organisation.

Troubleshooting Expertise
Apart from learning to implement solutions, they'll also master troubleshooting and optimising RPA processes, making them invaluable assets in problem-solving situations.Your staff won't just learn theories; they'll apply these skills in real-world scenarios, ensuring they can bring immediate value to your organisation.
